### **Reasons For Allowance**

The following is an examiner's statement of reasons for allowance:

In view of the **applicants' amendment/response and terminal disclaimer filed July 22, 2004** in which it was established that the reinforced molding compositions having ***a pseudoplastic rheological behavior defined by shear thinning viscosity parameters whereby the viscosity of the composition at a shear velocity of  $10\text{ s}^{-1}$  is greater than  $1000\text{ s}^{-1}$  is less than 300 Pas at a processing temperature that is 40 to 80°C above the melting point of the molding composition***; that the molding compositions have a significantly higher viscosity at low shear velocities compared to standard polyamides and comparably lower viscosities at higher shear viscosities in ***the claimed method of using a reinforced molding polyamide resin compositions wherein the resin is at least one member selected from the group consisting of (co)polyamide 6 and (co)polyamide 6,6, wherein the composition exhibits a viscosity at a shear velocity of  $10\text{ s}^{-1}$  is greater than  $1000\text{ s}^{-1}$  Pas, and at a shear velocity of  $1000\text{ s}^{-1}$  its viscosity is less than 300 Pas at a processing temperature that is 40 to 80°C above the melting point of the molding composition, said method comprising preparing an article by thermoforming.***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Farkas is cited to show the state of the art of polyamide compositions.
